About me

I'm a detail-oriented Software Engineer with 7+ years of experience turning ideas into reliable, scalable applications. I specialize in clean architecture, well-structured code, and thoughtful problem-solving, while also leading and mentoring teams to deliver high-quality solutions. Building systems that not only perform efficiently but also provide meaningful user experiences is what drives my work.

Skills

Frontend

Backend

Dev Ops

Project Management

Technical Expertise

- Frontend Development [Vue, React , Angular]
- PHP Frameworks [Laravel , Drupal , WordPress]
- Version Control [GitHub , GitLab , Bitbucket]
- DevOps & Server Management [Digital ocean , Aws]
- Project Management [Trello , Slack , Jira]

Professional Traits

1. I bridge code and leadership
2. Quality is my default mindset.
3. I think in products, not just features.
4. I've worn multiple hats successfully.
5. I blend creativity with engineering.
6. Reliable team player with strong ownership and discipline

Experience

Jul 2024 - Present

Tanvi Tech Pvt Ltd | Narephat

Senior Php Developer

July 2023 - June 2024

Lotus Innovation | Rabi bhawan

Senior Php Developer | Technical Delivery Manager

2019 - 2023

Lotus Innovation | Kapan

Senior Php Developer

2018 - 2019

Bidhee pvt. ltd | Baneshwor

Senior Php Developer

2017 - 2019

A1 It Solution | Kupandole

Senior Php Developer

PROJECT COMPLETED

(1) CONTENT MANAGEMENT SYSTEM

I have developed multiple Laravel-based websites for a diverse range of clients, including schools, consultancy firms, and government organizations. Beginning with Laravel 5.2, I have consistently applied core MVC (Model-View-Controller) principles to build structured and maintainable applications. My work includes integrating widely used Laravel packages such as Spatie and SweetAlert to enhance functionality and user experience. On the frontend, I have worked with Bootstrap, React.js, and Vue.js, collaborating closely with frontend designers using Figma and ensuring full mobile responsiveness in line with project and client requirements.

(2) NEWS PORTAL

I have developed several of Nepal's most widely used news portals using Laravel with Bootstrap, Vue.js, and React.js. These projects were built with a strong adherence to Laravel's MVC architecture, incorporating model relationships, view composers, and custom helper functions to ensure clean, maintainable code. I applied the repository pattern and designed modular, package-based components for each major feature of the news platform. In addition, I created a reusable base news portal template, which has been leveraged to build multiple high-traffic news portals across Nepal.

(3) LAB REPORT SYSTEM

I contributed to the development of a Lab Management System with a strong focus on managing and processing laboratory test data. The system supports secure data storage and updates, automated client notifications, and the generation of invoices and analytical reports. It was built using Laravel, utilizing Eloquent ORM for efficient and scalable data management, Laravel Notifications for real-time client communication, and Laravel's PDF generation capabilities to produce professional invoices and reports.

(4) HR PAY ROLL SYSTEM

I have experience developing HR and payroll systems using Laravel, focusing on employee management, attendance and leave tracking, and accurate payroll processing. My work includes handling salaries, deductions, taxes, and benefits while ensuring compliance and usability. I prioritize clean architecture, data accuracy, and scalable, user-friendly solutions.

(5) ECOMMERCE [SINGLE / MULTI VENDOR]

I have built single-vendor and multi-vendor eCommerce platforms using Laravel, featuring product and order management, customer handling, cart and checkout, payment and shipping integrations, and reporting. I used barryvdh/laravel-dompdf and maatwebsite/excel for PDF and Excel exports, and spatie/laravel-permission for role-based access control, ensuring scalable and secure solutions.

(6) RIDE SHARING APPLICATION

I worked on a ride-sharing application using Laravel, where I was responsible for both CMS and API development. I implemented Laravel Passport for secure API authentication and used Swagger to create clear and comprehensive API documentation. API endpoints were thoroughly tested using Postman. To improve user engagement, I integrated OneSignal for real-time notifications and Sparrow SMS for secure OTP-based user verification. The application followed HMVC architecture for modularity and scalability, along with the Repository Pattern and SOLID principles, resulting in a robust, maintainable, and reliable ride-sharing platform.

(7) API DEVELOPMENT

I have extensive experience designing and developing APIs for a wide range of mobile applications, including payroll systems, HR management platforms, ride-sharing solutions, and travel agency applications. My development approach emphasizes security and reliability, utilizing Laravel Passport for robust authentication, Swagger for clear and comprehensive API documentation, and Postman for thorough testing. I consistently follow secure API development best practices, ensuring proper use of standard HTTP status codes and well-structured JSON responses to deliver seamless interoperability and an optimal user experience across applications.

(8) OTHER FRAMEWORKS

I have extensive experience in PHP frameworks such as CodeIgniter, WordPress, and Drupal, encompassing theme development, as well as plugin and module development. My proficiency extends to working with WooCommerce and Elementor, enhancing functionality and design within these platforms.
